

29 November 2024

## Objective

AQLT aims to track an index (before fees and expenses) that comprises 40 high quality companies, selected based on three 'quality' metrics – high return on equity, low leverage and relative earnings stability.

## Benefits

### Outperformance potential

AQLT's focus on quality aims to produce long-term performance superior to that of the benchmark S&P/ASX 200 Index.

### Portfolio diversification

AQLT's Index has tended to have different sector weightings to benchmark Australian equities indices, with higher exposure to sectors such as consumer discretionary and lower exposure to the materials (mining) sector, offering potential portfolio diversification benefits.

### Cost-effective

With management costs of only 0.35% p.a. (or \$35 for every \$10,000 invested)\*, AQLT is a cost-effective solution for investors seeking exposure to the performance of quality Australian companies.

\*Other costs apply. Please refer to the PDS.
