

Betashares Australian Equities Strong Bear Hedge Fund

ASX: BBOZ

betashares

29 November 2024

Objective

BBOZ seeks to generate magnified returns that are negatively correlated to the returns of the Australian sharemarket. BBOZ expects to generate a magnified positive return when the S&P/ASX 200 Accumulation Index falls (and a magnified negative return when the Index rises).

Strategy

BBOZ is a geared 'inverse ETF'. It invests in cash and cash equivalents and sells equity index futures contracts (i.e. ASX SPI 200 futures) to obtain a magnified (or geared) exposure. Selling these futures can typically be expected to generate a positive return when the S&P/ASX 200 Accumulation Index declines on a given day, and a negative return when the Index increases. A 1% fall in the Australian sharemarket on a given day can generally be expected to deliver a 2% to 2.75% increase in the value of BBOZ (and vice versa).

Benefits

Hedge your portfolio

Protect your portfolio from market declines, without having to sell your shares and crystallise capital gains.

Profit from declining markets

As an "inverse ETF", BBOZ gives you the opportunity to make magnified gains when the Australian sharemarket falls.

Convenience

Investing in BBOZ avoids the costs and complications of futures, CFDs and short selling. Investors are not exposed to margin calls.

Performance

PERIOD	1 mth	3 mth	6 mth	1 yr	3 yr (p.a.)	5 yr (p.a.)	10 yr (p.a.)	Inception (p.a.)
FUND	-7.76%	-9.46%	-17.92%	-32.29%	-17.74%	-22.78%	-	-20.53%
S&P/ASX 200	3.79%	5.47%	11.53%	23.42%	9.55%	8.28%	-	8.14%

Calendar year performance

PERIOD	YTD	2023	2022	2021	2020	2019	2018	2017
FUND	-19.29%	-19.62%	-7.77%	-32.84%	-35.93%	-40.78%	10.21%	-20.18%

Value of \$100 invested since inception

Source: Betashares, Bloomberg. Past performance is not indicative of future performance.

Graph shows fund performance relative to the S&P/ASX 200 Accumulation Index since fund inception. The fund's portfolio is actively managed and should not be expected to provide any particular short multiple of the market return over any time period.

Fund returns are calculated in A\$ using net asset value per unit at the start and end of the specified period and do not reflect the brokerage or bid-ask spread that investors may incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account income tax.

Fund information

Betashares Funds can be bought or sold during the trading day on the ASX, and trade like shares.

The Strong Bear Strategy

BBOZ's portfolio exposure is actively monitored and adjusted to stay within a -2x to -2.75x range on any given day. BBOZ's returns will not necessarily be in the range -2x to -2.75x over periods longer than a day, due to the effects of rebalancing and compounding of investment returns over time. Investors should monitor their investment to ensure it continues to meet their investment objectives.

BBOZ uses futures (i.e. ASX SPI 200 futures) to obtain a magnified (or geared) short exposure, rather than the underlying shares. As the futures market closes at a later time to the share market, at times BBOZ's performance for a given day may differ from that indicated by the sharemarket.

Investors in geared strategies should be willing to accept higher levels of investment volatility and potentially large moves (both up and down) in the value of their investment. Investors should seek professional financial advice before investing, and monitor their investment actively. BBOZ does not track a published benchmark.

BBOZ's strategy of seeking returns that are negatively correlated to market returns is the opposite of most managed funds. Returns over periods longer than a day will not necessarily be equivalent to the expected return on a given day. Gearing magnifies gains and losses and may not be a suitable strategy for all investors.
